SUBJECT INDEX

Abrasion
corrosion–abrasion wear resistance of 28%Cr white cast iron containing B, 347
Abrasive papers
deterioration of bonded abrasive papers during the wear of metals, 77
Abrasive wear
abrasive wear study of laser surface alloying of Cr onto AISI 1018 steel, 9
Adhesive wear
burnishing and adhesive wear of an electrically conductive polyester–carbon film, 265
Alloys
mechanical–chemical wear process of an Al alloy bearing, 321
Aluminium
effect of blending of SiC particles in varying sizes on the erosion of Ti–6Al–4V, 235
mechanical–chemical wear process of an Al alloy bearing, 321
Auger electron spectroscopy
detection of tribofragments of P compounds by AES and SIMS, 99

Bearings
mechanical–chemical wear process of an Al alloy bearing, 321
new method of description of dynamic properties of slider bearings, 205
non-linear transient analysis for an externally pressurized porous gas journal bearing, 139
study of the film formation for a rough slider bearing, 23
Boron
corrosion–abrasion wear resistance of 28%Cr white cast iron containing B, 347
Burnishing
burnishing and adhesive wear of an electrically conductive polyester–carbon film, 265

Carbon
burnishing and adhesive wear of an electrically conductive polyester–carbon film, 265
Cast iron
corrosion–abrasion wear resistance of 28%Cr white cast iron containing B, 347
wear tests of grey cast iron against ceramics, 337
Ceramics
metallic film transfer during metal–ceramic unlubricated sliding, 361
unlubricated friction and wear behaviour of toughened zirconia ceramics, 151
wear tests of grey cast iron against ceramics, 337
Chromium
abrasive wear study of laser surface alloying of Cr onto AISI 1018 steel, 9
corrosion–abrasion wear resistance of 28%Cr white cast iron containing B, 347
Composites
friction and wear studies of a short glass fibre reinforced polyetherimide composite, 247
Contacts
new method for the experimental investigation of contact in mixed lubrication, 221
Corrosion
corrosion–abrasion wear resistance of 28%Cr white cast iron containing B, 347

Electrical properties
burnishing and adhesive wear of an electrically conductive polyester–carbon film, 265
Erosion
effect of blending of SiC particles in varying sizes on the erosion of Ti–6Al–4V, 235

© Elsevier Sequoia/Printed in The Netherlands

Films
effect of thickness on the lives of polystyrene films subjected to fretting conditions, 49
metallic film transfer during metal–ceramic unlubricated sliding, 361
study of the film formation for a rough slider bearing, 23
Fretting
effect of thickness on the lives of polystyrene films subjected to fretting conditions, 49
Friction
friction and wear studies of a short glass fibre reinforced polyether-imide composite, 247
unlubricated friction and wear behaviour of toughened zirconia ceramics, 151

Gas bearings
non-linear transient analysis for an externally pressurized porous gas journal bearing, 139
Glass fibres
friction and wear studies of a short glass fibre reinforced polyether-imide composite, 247
high speed steel tool wear studies in machining of glass-fibre-reinforced plastics, 327

Hardness
scratch hardness and wear performance of laser-melted steels: effects of anisotropy, 59
High speed steel
machining characteristics of laser W surface-alloyed M2 high speed steel, 123

Journal bearings
non-linear transient analysis for an externally pressurized porous gas journal bearing, 139

Lasers
abrasive wear study of laser surface alloying of Cr onto AISI 1018 steel, 9
machining characteristics of laser W surface-alloyed M2 high speed steel, 123
scratch hardness and wear performance of laser-melted steels: effects of anisotropy, 59
Lubrication
new method for the experimental investigation of contact in mixed lubrication, 221
analysis of squeeze film lubrication between two rectangular porous plates with a second-order fluid, 303

Machining
high speed steel tool wear studies in machining of glass-fibre-reinforced plastics, 327
machining characteristics of laser W surface-alloyed M2 high speed steel, 123
Material transfer
metallic film transfer during metal–ceramic unlubricated sliding, 361
Mechanical–chemical wear
mechanical–chemical wear process of an Al alloy bearing, 321
Metal physics
correlation of tribological and metal physics data: the role of stacking fault energy, 1
Metals
deterioration of bonded abrasive papers during the wear of metals, 77
metallic film transfer during metal–ceramic unlubricated sliding, 361

Particles
effect of blending of SiC particles in varying sizes on the erosion of Ti–6Al–4V, 235
Perfluoroalkyl polyether oils
tribological reactions of perfluoro-alkyl polyether oils with stainless steel under ultrahigh vacuum conditions at room temperature, 111
Phosphorus
detection of tribofragments of P compounds by AES and SIMS, 99
Plastics
high speed steel tool wear studies in machining of glass-fibre-reinforced plastics, 327
Polyester
burnishing and adhesive wear of an electrically conductive polyester–carbon film, 265

Polyetherimide
friction and wear studies of a short glass fibre reinforced polyetherimide composite, 247
Polymers
rolling contact wear of polymers: a preliminary study, 183
Polystyrene
effect of thickness on the lives of polystyrene films subjected to fretting conditions, 49
Polystyrene films
effect of thickness on the lives of polystyrene films subjected to fretting conditions, 49
Porous bearings
non-linear transient analysis for an externally pressurized porous gas journal bearing, 139

Rolling contact
rolling contact wear of polymers: a preliminary study, 183
Roughness
study of the film formation for a rough slider bearing, 23

Scratching
scratch hardness and wear performance of laser-melted steels: effects of anisotropy, 59
Sealing
investigation into the mechanism of sealing in shaft stuffing boxes, 39
Secondary ion mass spectrometre
detection of tribofragments of P compounds by AES and SIMS, 99
Silicon carbide
effect of blending of SiC particles in varying sizes on the erosion of Ti–6Al–4V, 235
Slider bearings
new method of description of dynamic properties of slider bearings, 205
study of the film formation for a rough slider bearing, 23
Sliding
metallic film transfer during metal–ceramic unlubricated sliding, 361
Squeeze films
analysis of squeeze film lubrication between two rectangular porous plates with a second-order fluid, 303
Stacking fault energy
correlation of tribological and metal physics data: the role of stacking fault energy, 1
Stainless steel
tribological reactions of perfluoroalkyl polyether oils with stainless steel under ultrahigh vacuum conditions at room temperature, 111
Steels
abrasive wear study of laser surface alloying of Cr onto AISI 1018 steel, 9
high speed steel tool wear studies in machining of glass-fibre-reinforced plastics, 327
machining characteristics of laser W surface-alloyed M2 high speed steel, 123
scratch hardness and wear performance of laser-melted steels: effects of anisotropy, 59
Stuffing boxes
investigation into the mechanism of sealing in shaft stuffing boxes, 39
Surface alloying
machining characteristics of laser W surface-alloyed M2 high speed steel, 123
Surface profiles
complete description of surface texture profiles, 173
Surfaces
abrasive wear study of laser surface alloying of Cr onto AISI 1018 steel, 9
complete description of surface texture profiles, 173

Titanium
effect of blending of SiC particles in varying sizes on the erosion of Ti–6Al–4V, 235
Tools
high speed steel tool wear studies in machining of glass-fibre-reinforced plastics, 327
Tribofragments
detection of tribofragments of P compounds by AES and SIMS, 99
Tribological reactions
tribological reactions of perfluoroalkyl polyether oils with stainless steel under ultrahigh vacuum conditions at room temperature, 111

Tribology
correlation of tribological and metal physics data: the role of stacking fault energy, 1
Tungsten
machining characteristics of laser W surface-alloyed M2 high speed steel, 123

Ultrahigh vacuum
tribological reactions of perfluoroalkyl polyether oils with stainless steel under ultrahigh vacuum conditions at room temperature, 111
Unlubricated behaviour
unlubricated friction and wear behaviour of toughened zirconia ceramics, 151

Vanadium
effect of blending of SiC particles in varying sizes on the erosion of Ti–6Al–4V, 235

Wear
abrasive wear study of laser surface alloying of Cr onto AISI 1018 steel, 9
burnishing and adhesive wear of an electrically conductive polyester–carbon film, 265
corrosion–abrasion wear resistance of 28%Cr white cast iron containing B, 347
deterioration of bonded abrasive papers during the wear of metals, 77
friction and wear studies of a short glass fibre reinforced polyetherimide composite, 247
high speed steel tool wear studies in machining of glass-fibre-reinforced plastics, 327
mechanical–chemical wear process of an Al alloy bearing, 321
rolling contact wear of polymers: a preliminary study, 183
scratch hardness and wear performance of laser-melted steels: effects of anisotropy, 59
unlubricated friction and wear behaviour of toughened zirconia ceramics, 151
wear research on large-scale test specimen, 287
wear tests of grey cast iron against ceramics, 337

Zirconia ceramics
unlubricated friction and wear behaviour of toughened zirconia ceramics, 151
